RLM eCommerce

MAJOR BENEFITS OF RLM eCOMMERCE :

• Omni Channel Inventory

• Segregate eCom Inventory from Wholesale/Retail

• All Sales in Single Location

• Factor Interfacing

• Picking, Packing & Shipping Share Same Process Flow

• All Returns Processed in Same Software

• Integrations to UPS, FedEx, Purolator and Canadian postacross all channels

• Returns/Credits are integrated into Shopify

The sophistication of RLM's eCommerce APIs allow you to easily bridge the gap between your multi-channel businesses to achieve an omni-channel inventory.

With RLM eCommerce, you can divide your eCommerce inventory from your Wholesale and Retail inventories while viewing all sales in a single interface. All picking, packing and shipping functions share a common software process flow and all returns can be processed in the same software. And RLM eCommerce facilitates integrations to UPS, FedEx, Purolator and Canadian post.

RLM Apparel Software is capable of being integrated with many of the leading ecommerce solutions. Some of our e-Commerce partners include:

Contact RLM Apparel Software to further discuss the benefits of connecting your eCommerce platform with RLM's ERP and distribution management software.
