- Foreign Currency Capable

RLM Financials eliminates the need for double entry of sales, cost information, AR, and inventory information into your General Ledger. **RLM Financials**, AR, AP, and GL systems are fully integrated with the **RLM ERP** system, which allows users to automatically post sales, cost of goods sold, and other important financial information. Built-in reporting will automatically identify any out-of-balance GL conditions, saving you countless hours searching for discrepancies.

The feature-rich **RLM Financials** includes everything you need to turn your financial accounting experience into a pleasure. Take your business to the next level and start closing your books in record time immediately at the end of each month.

RLM Financials is fully integrated with the **RLM Software Suite** and is available in cloud-based subscription with low startup costs. Contact RLM today for more information and a free demo.
